Date: Monday, October 17, 2016 1:03:45 PM

Ian and Bill,

EPA is available to meet on Monday, October 31, beginning at 11:00 am. Let's plan to have our meeting here at the EPA office. Attending on behalf of EPA will be me, Rebecca Chu, and Kristen Kerns from the Army Corps. of Engineers. Immediately below is a proposed agenda for our meeting.

Purpose: To discuss the ongoing risks to human health and the environment under current conditions at the EMJ site; and ways to address the risk (legal framework; technical). Also identify any of the OMMP revisions that can be done under current site conditions.

- Overview: Breakthrough Analysis prepared by Corps of Engineers
- Next Steps- calculating volume areal extent of risk
- Mechanisms to address the risk
- Next Steps
- OMMP Revisions- is there work that can occur under current site conditions?

Please let me know if there is a need to clarify or add to the proposed agenda. Also, please let me know who will be in attendance at the meeting for Earle M. Jorgensen Company.

Thank you,

Richard

Subject: RE: Jorgensen Forge Early Action Area

Richard,

Unfortunately, the week of October 24-28 is going to be very challenging on our end. Would

Monday, October 31, at 11 am work for EPA? We look forward to continued progress. Thanks very much,

Ian

Subject: Jorgensen Forge Early Action Area

Bill and Ian,

Attached is the analysis developed for EPA by the Army Corps of Engineers of the potential threats posed by the sediment contamination which remains in the Jorgensen Forge Early Action Area of the Lower Duwamish Waterway Superfund Site. EPA would like to convene a meeting sometime during the week of October 24-28 with representatives of Earle M. Jorgensen Company to discuss this analysis and the next steps for this Area. Please let me know the availability of you and others for such a meeting.

Thank you,

Richard
